

Thank you for your interest in accessing our inventory download files!

There are two product information files available for download which include information about each product RSR offers including SKU, suggested retail price, quantity, short description and long description:

1. The **RSR Inventory file** (rsrinventory-new.txt) is a complete listing of our product offering including items requiring a Federal Firearms License (FFL). This listing includes stocking items and does not contain items shipped directly from the manufacturer.
2. The **Fulfillment Only Inventory file** (fulfillment-inv-new.txt) is intended for fulfillment or drop-ship customers who ship product directly to consumers. This file does not contain any items requiring an FFL, nor does it include any items that are restricted to fulfillment accounts.

Please choose the file that pertains to your business. Both files are updated every two hours on a daily basis. The first update is at 7:05 a.m. ET, and it runs every two hours until the last update at 7:05 p.m. ET.

We also offer an **Inventory Quantity file** (IM-QTY-CSV.csv) which details the SKUs and the available quantities. This file is updated every five minutes.

The **Inventory Layout file** (rsr_inventory_file_layout-new.txt) defines the fields included in the inventory file.

We also offer image downloads. Images on the site are categorized by the following criteria:

- RSR Group Stock Number (SKU) in alphabetical sequence;
- Manufacturer Name;
- Product Category; and
- New Images Uploaded in the last 28 days.

Please let us know if you have any questions or if we can be of any further assistance.

Thanks,

RSR Web Support
